

NO WELDING OR PAINTING REQUIRED!

#1000R RHINO 3-SHELF BRACKET SYSTEM

#1000R RHINO 3-SHELF BRACKET SYSTEM DESCRIPTION:

Our newly designed Rhino 3-Shelf Bracket System features a removable hook which transforms our normal container shelf bracket into a wall mountable shelf. This versatility allows you to add secure shelving in your shipping container or storage/garage wall by just adding or removing the D-ring hook and T-bar stabilizer. This bracket has three tiers and uses two 2x10 pieces of construction grade wood per shelf providing an 18.5" deep shelf. Two bracket units are required to make a complete shelving system giving you 2200 lbs. (1 ton) loading capacity when mounted correctly*. Apply loads evenly over the length and width of the shelves.

**When using storage/garage well-mount installation ensure brackets are mounted to a secure backing that can withstand the weight capacity.*

This product cannot be shipping into the USA.

SPECS

- 60" H x 21" W / 1.52 m x 0.53 m
- 18.5" / 470 mm deep
- 16 lbs. / 7.25 kg per bracket

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
