#4212R RHINO 4-SHELF BRACKET (DEEP)

#4212R INSTA RHINO 4-SHELF BRACKET (DEEP) DESCRIPTION:

The INSTA Deep 4-Shelf Bracket delivers superior strength while not being bulky or heavy. The brackets provide immense shelf space and rigid stock storage without interfering with valuable floor space. The brackets pay for themselves in labour saving the first time they are used, simply hook the bracket onto the shipping container D-rings and start storing. This bracket has four tiers and uses two 2x12 pieces of construction grade wood per shelf providing a 22.5" deep shelf. Two bracket units are required to make a complete shelving system giving you 2400 lbs. (1.2 ton) loading capacity. Adding an additional #4212R INSTA 4-Shelf Bracket unit increases loading capacity to 3600 lbs. (1.8 tons). **This product cannot be shipped to USA.**

INSTA Container Modifications is a proud charter member of the National Portable Storage Association (NPSA).

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
