

NO WELDING OR PAINTING REQUIRED!

#6204 INSTA HANGING STACKING CONE (LOCKING)

#6204 INSTA HANGING STACKING CONE (LOCKING)

These INSTA hanging stacking cones are designed to safely stack shipping containers and to keep them in position while stacked. Lateral movement is eliminated when these hanging stacking cones are in place. While in use, containers are separated by the thickness of the flange.

INSTRUCTIONS:

1. Lift container.
2. While container is suspended, place hanging stacking cone into the underside of a bottom corner casting, cone facing down. Ensure it locks in place with the locking lever.
3. Repeat the above on the remaining three bottom corner castings.
4. With all four hanging stacking cones locked to the underside of the container's corner castings, lift the container to stack onto another container of the same size.

SPECS

- 8.3 lbs / 3.75 kgs
- 4.75" / 120 mm overall height
- Breaking load of 50 tons

FEATURES

- Cast steel construction
- Galvanized finish resists corrosion

5. Align the newly-placed cones in the upper container with the corner casting holes of the lower container.
6. Lower upper container until fully bearing on lower container.
7. Ensure each corner of the upper container is fully seated on the hanging stacking cone flange.
8. Your container is now securely stacked.

INSTA Container Modifications is a proud charter member of the National Portable Storage Association (NPSA).

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
