

NO WELDING OR PAINTING REQUIRED!

## #7101 & #7102 INSTA AC POWER PORT - SINGLE & DUAL

### #7101 & #7102 INSTA AC POWER PORT - SINGLE & DUAL:

Do you need a nice clean way to transfer power from outside of your container to the inside? That is, not through a doorway or window? We have it for you! It's our INSTA 120V AC Power Port.

The NEMA 5-15P male end is your standard household plug (used to connect small appliances such as power tools, lighting, etc. to a wall outlet) except with a flange to attach it to your container wall. The cable on this power port has an SJTW rating. What is an SJTW cable? That means it is a hard service cable designed with a 300V rating and a durable jacket for weather resistance, so you can use it in an industrial environment. The jacket of an extension cord is what protects the electrical wires from exposure to the elements. What makes an SJTW cable safe for industrial use is the material used to create the jacket. Thermoplastic vinyl is water and abrasion resistant allowing you to put it through rough usage. Not only that! The materials used in this power port are RoHS compliant meaning they conform to a product-level compliance regulation that restricts the use of specific hazardous materials found in electrical and electronic products.

#### WHY SHOULD YOU USE A POWER PORT?

- Useful for electrical appliances and tools.
- Durable for industrial use.
- Excellent choice for lighting power.

#### INSTALLATION:

The power ports are quick and easy to install as follows...

1. Drill a 2" hole in container wall.
2. Insert power port with flange on outside.
3. Using screws provided, fasten flange to wall.
4. Done! Plug in cable on the outside.

You now have power on the inside!

#### SPECS

- Male end flange dimensions: 2 9/16" (65mm) square
- Four 0.17" (4.3mm) dia. holes on a 2" x 2" (50mm x 50mm) hole pattern
- 19.7" (0.5m) overall length
- 14 gauge wire, rated for 15 amps
- 0.375" (9.5mm) dia. black PVC cable jacket
- Male end is a NEMA 5-15P flanged socket
- SJTW rated cable meaning durable and waterproof
- RoHS-compliant materials
- Marine grade construction = fully waterproof assembly
- Hardware included (four self-tapping screws)

#### FEATURES

- Available in two models:
  - INSTA #7101 with a single female outlet
  - INSTA #7102 with dual female outlets
- Waterproof cover on male (exterior) end
- Rubber gasket provides waterproof seal between mounting flange and container corrugation
- Protective cover on female ends (container interior)
- Easy to install in under 30 minutes

INSTA Container Modifications is a proud charter member of the National Portable Storage Association (NPSA).

**WARNING** - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
