

NO WELDING OR PAINTING REQUIRED!

#7201, #7202 INSTA CONTAINER PATCHES

#7201, #7202 INSTA CONTAINER PATCHES

DESCRIPTION:

The RapidFix UV Fiber Patch is a quick, effective solution for surface repairs in the container and portable storage industries. It can also be used for endless other industries and applications. This self-adhesive patch is activated by sunlight or UV light and made from fiberglass-reinforced polyester, creating a strong, permanent bond ideal for use on metal, plastic, and composite surfaces. Once cured, the patch can be drilled, sanded, and painted—allowing it to seamlessly blend with its surroundings for a professional, long-lasting finish. It's non-toxic, non-flammable, and built to withstand tough conditions without compromising safety or performance.

INSTALLATION

1. Remove from resealable package, cut to fit repair area.
2. Seal remainder in the foil pack for future use.
3. Place cut-to-fit piece over hole or damaged area.
4. Cure with the UV flashlight or sunlight for 5 minutes. (Allow 50 minutes on a cloudy day.)
5. Sand, drill or paint as required.

SPECS

- Made of fiberglass-reinforced polyester
- UV-activated
- Bonds to virtually any surface
- Available in two sizes
 - #7201 – 3" x 6" (75 x 150mm)
 - #7202 – 6" x 9" (150 x 225mm)

FEATURES

- Cost-effective
- Easy to apply
- Cures quickly
- Very durable
- Paintable

INSTA Container Modifications is a proud charter member of the National Portable Storage Association (NPSA).

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
